WEEKLY MORBIDITY REPORT
EXPLANATORY COMMENT

REPORT NO. 185
PAGE 1

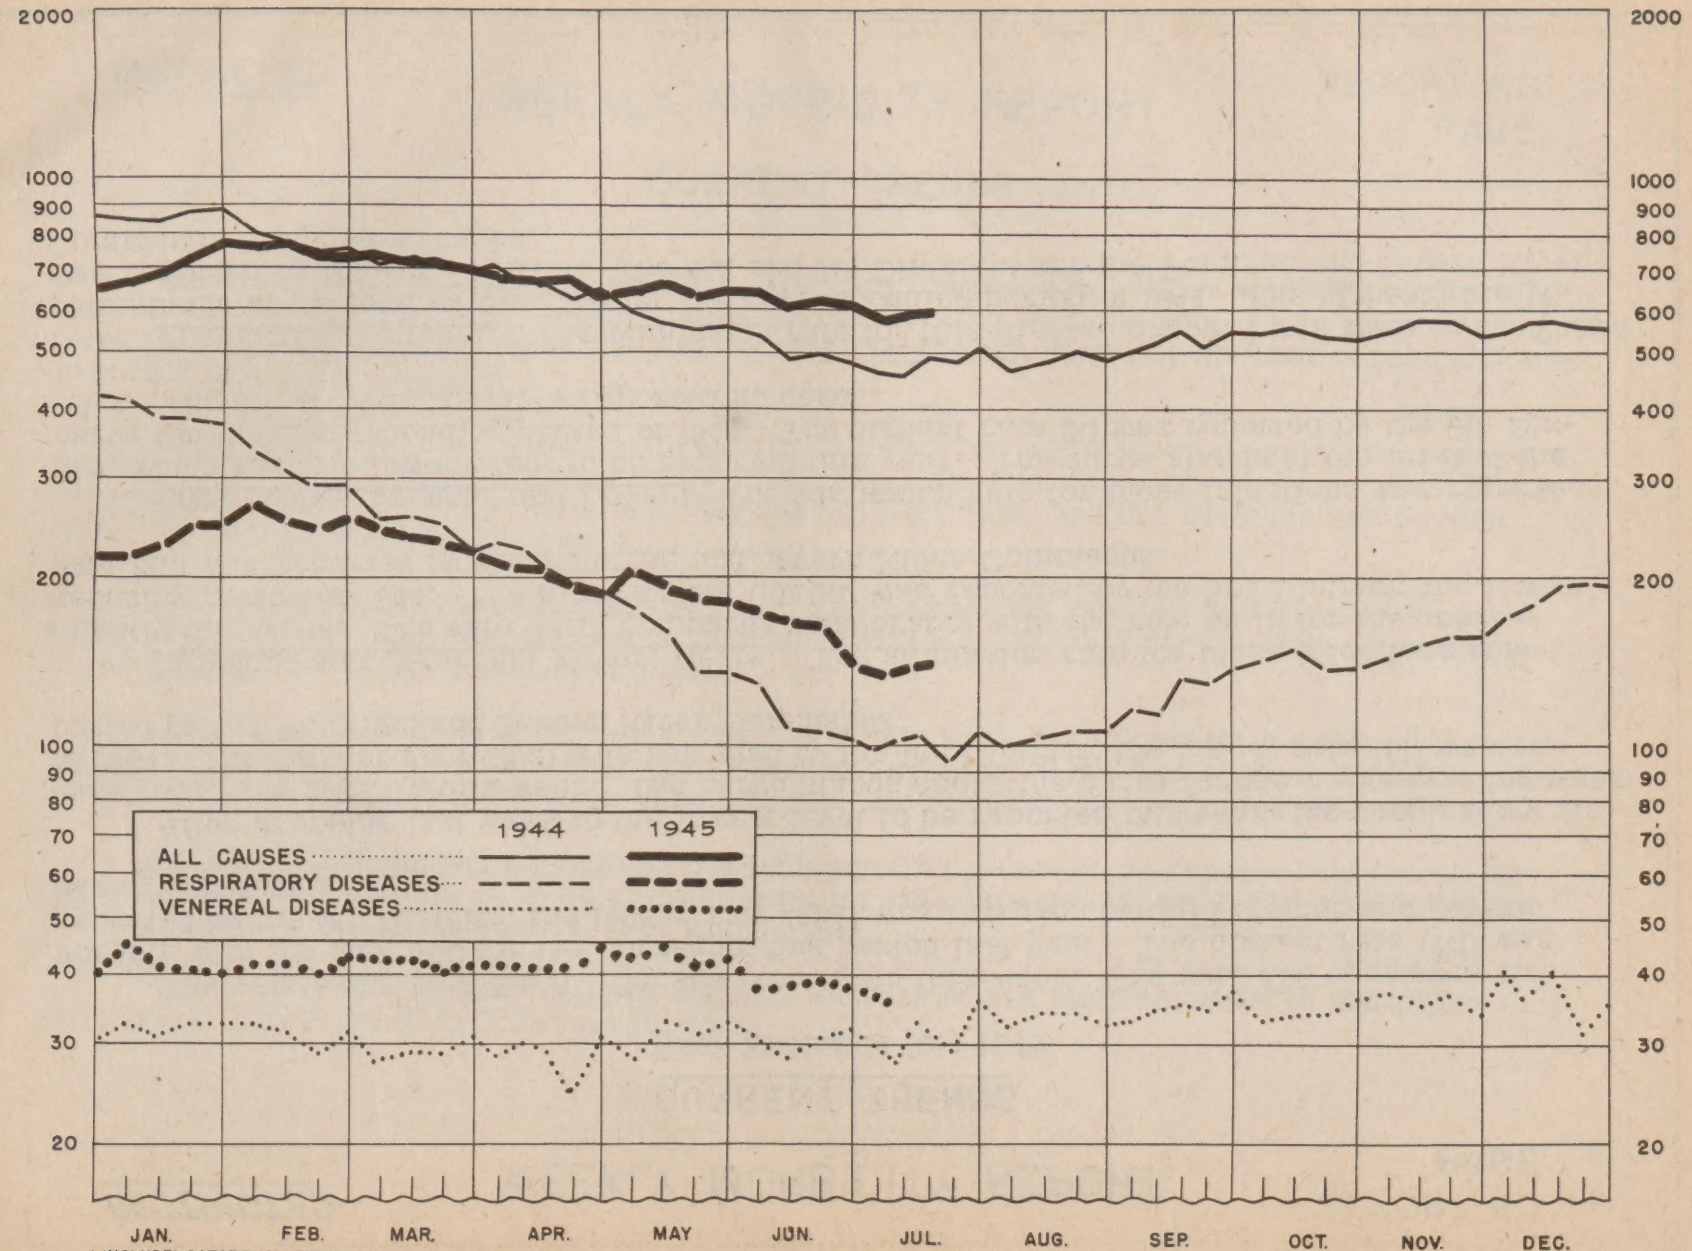

This report presents each week the annual admission rates per 1000 average strength for certain communicable diseases, venereal diseases, and all causes combined (diseases, injuries and poisonings). Source material is the weekly communicable disease reports submitted to BuMed by all shore stations within the continental limits of the United States.

Admission rates are calculated on an annual basis to facilitate comparison with corresponding annual, quarterly or monthly figures. Such annual rates of admission indicate the number of admissions per 1000 average strength which would occur over a year's time if the current week's experience continued for a year. They are obtained as follows:

$$\frac{\text{Number of Admissions During the Week} \times 52}{\text{Average Strength for the Week}} \times 1000$$

In order to make this report promptly available the figures contained herein are presented, in general, as reported. The symbol # indicates that current data are not available. In such cases, the most recent data are utilized.

Shore stations with an average strength of 500 or more are listed individually; stations under 500 strength are grouped.

*INCLUDE: CATARRHAL FEVER, ACUTE; INFLUENZA;
PNEUMONIA-BRONCHO, LOBAR & ATYPICAL;
TONSILLITIS, ACUTE & PHARYNGITIS, ACUTE

CURRENT TRENDS

Week Ending 14 July 1945

The admission rate for All Causes rose again this week. The rate 598 compares unfavorably with the rate 460 for the corresponding period last year. The highest rate (711) was reported by the 9th District; the lowest rate (454) was reported by the Potomac and Severn River Commands.

After dropping last week to the lowest level to be reported this year, the respiratory disease rate rose slightly this week. The curve stands above the curve for the corresponding week of 1944. The highest rate (239) was reported by the 9th District; the lowest rate (51) was reported by the Potomac and Severn River Commands.

Influenza and Catarrhal Fever, Acute. The admission rate for these infections rose slightly this week. The rate 88.17 compares unfavorably with the rate 68.12 for the corresponding period of 1944. The highest rate (161.00) was reported by the 3rd District; the lowest rate (25) was reported by the Potomac and Severn River Commands.

Pneumonia--Broncho and Lobar. The admission rate for these infections was reported at 1, which was the lowest rate to be reported this year. The curve stands at the level of the curve for the corresponding period of 1944. The highest rate (3) was reported by the 9th District. The 4th and 7th Districts reported no cases.

Pneumonia, Atypical. The admission rate for this disease dropped this week to 2. This rate stands at the level of the rate for the corresponding period of 1944. The highest rate (4) was reported by the 11th District. The 4th and 7th Districts and the Potomac and Severn River Commands reported no cases.

WEEKLY MORBIDITY REPORT

REPORT NO. 185

PAGE 4

CURRENT TRENDS CONTD.

Tonsillitis and Pharyngitis, Acute. The rate for these infections was reported at 47 for three consecutive weeks. This rate compares unfavorably with the rate 31 for the corresponding week of 1944. The highest rate (121) was reported by the 9th District; the lowest rate (24) was reported by the 7th District.

Scarlet Fever. The admission rate for this disease was reported again this week at 4. The trend was up in five Districts: the 1st, 3rd, 5th, 12th, and 13th. The highest rate (17) was reported by the 9th District. The 4th, 6th, and 7th Districts, and the Potomac and Severn River Commands reported no cases.

Cerebrospinal Fever, Meningococcic. The admission rate for this disease dropped this week to 0.03. This rate compares favorably with the rate 0.12 for the corresponding period of 1944. Only one district reported cases.

Measles. A decided drop in the admission rate to 0.96 is shown this week. The curve stands well below the curve for the corresponding period of 1944. The highest rate (2) was reported by the 9th and 11th Districts. The 4th, 6th, and 7th Districts reported no cases.

Poliomyelitis, Anterior, Acute. No poliomyelitis cases were reported this week for Continental United States. The cumulative total for this disease reported for all Continental Stations January 1, 1945 to July 14, 1945 stands at 10.

The U. S. P. H. Service reports for this week show the civilian cases in six states with the highest incidence distributed as follows;

Texas	45	New Jersey	23
New York	29	California	22
Tennessee	27	South Carolina	11
